# **CARICATURE 101: FOR KIDS**

**In this three-hour course, students will learn the fundamentals of caricature and also general portraiture. We will discuss what is a caricature, how and why caricatures are used in society, and of course how to draw one.**

**This course not only discusses caricature, but it also covers basic fundamentals of portraiture and how to start a portrait in a different way.**

**Students will learn keywords and techniques that will help draw a better portrait and possibly become a better artist.**

**I will provide a demonstration on how I personally create a caricature and briefly explain how others may do it as well.**

**All participants will receive at-least a black and white portrait and one person will receive a color portrait done during the demo.**

**After the demo, students will practice techniques on themselves by creating a self-portrait using a mirror (provided).**

**The last hour will have students partnering up and drawing each other in 5-10 minute rounds. Each time starting a portrait in a different way that they may not be used to. Like starting with the hair or chin first instead of traditionally starting with the eyes or shape of the face.**

**Participants must feel comfortable being drawn and partnering with others.**

**Students just need a 9" by 12" drawing sketchpad or sketchbook. Everything else is provided for.**

**Students will receive a professional Caricature Portrait, a goodie bag, a chalk pastel set, sharpie markers, pencils, easer, folder with handouts on caricature, and of course keep artwork done during the class.**

**Class is suggested for Elementary and Middle School Levels. Ages 8-13.**

**Hope to see you there!**
